USF UNIVERSITY OF SOUTH FLORIDA

Spring 2017 report for STA 2122-006(23754) SOCIAL SCIENCE STATISTICS (Jasmon Bailey)

USF Student Assessment of Instruction

Project Audience: 42
Responses Received: 34
Response Ratio: 81%

Subject Details

Course Name: SOCIAL SCIENCE STATISTICS
Section: 006
College Name: Arts & Sciences
Department Name: Sociology
Term Title: Spring 2017
**First Name:** Jasmon
Last Name: Bailey

Section 1. Frequency Statistics

The charts below provide statistics and the response breakdown of how students answered each question.

## Select your rating of the following statements as pertaining to Jasmon Bailey

Competency Statistics	Value

College (12)	4.20

Section 3. Comments

The following are responses to two open-ended questions from your students pertaining to you, and the course.

Please provide any additional comments with respect to Jasmon Bailey

Comments
A very inspirational professor, made it rewarding to come to class. Made the material easy to grasp and was very attentive during instruction. His optimism made it a joy to come to class.
An excellent instructor who taught thoughtfully and though had a firm hand was also enjoyable to speak with.
Excellent teacher! Very passionate about the subject and willing to explain a concept until everyone understood.
Good semester thank you
Great professor!
Great Professor!
He is an outstanding professor! I'm not a math person but he explained everything so well and would go back in lectures to clear up any confusion.
He is one of the most genuine and caring professors I have had at USF and that part of his personality was definitely needed as a Statistics teacher. However, he consistently made mistakes while teaching and would claim he "did it on purpose" to make the whole class laugh. Instead it just left everyone confused because he would do multiple problems wrong. It almost seemed like he was teaching himself how to do it as he was teaching us. That aside, the one thing that made me lose respect for Mr. Bailey was that he let one student take over the class. She is one of the most disruptive classmates I have ever had and I wished Mr. Bailey had asked her to let him teach the class. Instead, on one day he handed her the marker and sat down while she taught a segment of his class. No student wants to be taught by another student who has failed Statistics three times.
He is very energetic and passionate in his teaching. Sometimes he goes a little fast through problems but that is my only critique
I liked the class I would just suggest to have an open mind on giving credit for other assignments besides just tests.
I loved his excitement throughout the class and teaching of the lessons.
I think Mr. Bailey is a very good teacher. He takes the time out to answer every question in class and go over things as much as needed. I just wish that he wasn't so strict on the phone policy, next semester he should change the policy so that people who have their phone out won't get their lowest test dropped and not punish the whole class. I was afraid of the syllabus for this class but Mr. Bailey is what made me stay.
It is a very frustrating course. A lot of work is put into the course but the only scores that reflect your test scores. Makes you feel as if all your extra work is for nothing. He also says he wants everyone to make an A but I do not feel that. Tests very challenging and not like the class. Also when looking for help the only thing he offered for me was to read the book more. Not satisfied with the professor
Mr. Bailey is a great instructor who genuinely cares about his students and their learning. The classroom environment is instructive, educational, fun, and inspirers participation. I usually do not talk much in any course but I feel like my opinions and answers are wanted and encouraged in his course. I learned a lot about statistics and I would recommend Mr. Bailey to anyone and everyone.
Mr.Bailey does an excellent job of getting himself and all the students excited about what he is teaching and although sometimes he talks too fast or says a confusing sentence, as soon as someone points it out to him he slows it down and makes sure everyone is on the same page and understands what is going on.
Really understands how to explain the material to students and make connections to real world problems, like issues within our own major and how we use statistics with them.
The best professor I've ever had. His willingness to help students is incredible. He makes the class fun and easy to understand. I looked forward to coming to class everyday.
The class was very enjoyable even though it was difficult thank you for being an outstanding teacher.
This class has a confusing grading system
Very enthusiastic and amusing professor. Knows the material very well and really loves statistics. Strict on the phone policy but, that's a good thing. Does not always respond to emails in a timely manner. Can be confusing in his expression of thoughts and ideas. Writes and talks very quickly, causing confusion. Also, erases things before giving us a chance to write it down and absorb the information. Also, writes things all over the board making it confusing to take coherent notes.
Very high energy that makes a dull class a lot more exciting!

Comments
Fairly easy and not a lot of work. Depends on your professor
good class, would prefer more homework to so many papers.
I enjoyed taking this class.
I have none
I learned many things that I may actually use in the real world.
It's frustrating that the Global Citizen Papers, the Online Quizzes and Pop Quizzesdo not count for anything towards the grade. They are all time consuming assignments that have no effect on the grade. If you do well, it doesn't change anything. If you don't do well, you get points knocked off. It's not fair.
The course was not too bad, although I would like to have worksheets and practice problems than papers. The papers are not helping me learn statistics.
Very good and entertaining teacher.
Was much easier than told it would be.
